

Important Dates for Community Water Systems

MINNESOTA DEPARTMENT OF HEALTH (MDH)

July 1, 2024

**Submit cybersecurity assessment
certification to MDH**

- This requirement is for public water systems that use operational technology, such as Supervisory Control and Data Acquisition (SCADA).
- Cybersecurity assessments may be self-assessments performed by the public water system or by a third party.
- See [Assessing Security of Public Water Systems](#) for additional cybersecurity resources.

August 15, 2024

Submit service line inventory to MDH

- The Lead and Copper Rule Revisions (LCRR) require public water systems to complete an inventory of all service lines in the distribution system.
- Inventory information will be uploaded into the Minnesota Lead Inventory Tracking Tool to meet State law and LCRR notification requirements.
- Templates and information can be found at [Lead Service Line Inventory Guidelines](#).

August 15, 2024

**Deadline for interest in free technical
assistance on climate resiliency**

- Drinking water, wastewater, and stormwater utilities are eligible to receive free technical assistance on climate risk assessment from U.S. Environmental Protection Agency's Creating Resilient Water Utilities (CRWU) initiative.
- CRWU will help approximately 75 utilities and communities identify long-term climate change adaptation strategies and potential funding options.
- Email Aliza Furneaux by August 15, 2024 with interest (furneaux.aliza@epa.gov).
