

# Biyaha Ceelka iyo Ilmahaaga

## Sida loo baaro

Badqabka iyo baarista ceelkaaga biyaha adiga ayaa mas'uul ka ah mar kasta. Waaxda Caafimaadka Minnesota (MDH) waxay ku talinaysaa in aad baarista biyahaaga u adeegsato shaybaar shahaado haysta. Waydii waaxda bay'adda iyo adeegga caafimaadka tilmaamaha la raaco ee ku saabsan adeegga baarista ceelasha iyo agabka muunada ee loo baahan yahay. Shaybaarka ayaa ka jawaabi kara su'aalaha la xidhiidha sida muunada loo qaado, qiimaha iyo waqtiga ay qaadanayso helitaanka natijjada.

## Maxaa Xiga?

Tillaabooyinka aad qaadi kartid haddii ay biyahaagu wasakhaysan yihin tayadadoo dunaya aysan ahayn heerkii la doonayay oo wax badan ka baro arrimahan.

## Baar biyaha ceelkaaga ka hor xilliga uurka ama inta lagu gudajiro

Baarista waa habka kaliya ee aad ku ogaan karto in ceelkaagu yahay mid badqab u leh ilmaahaga. Maadaama biyaha ceelasha Minnesota ay yihiin kuwa badqaba, haddana waxaa jiri kara ceelal wasakhaysan oo jirro u keeni kara ilmahaaga, sidoo kalana dhibaato ku ah kobacooda. Sida kaliya ee lagu ogaan karo in biyaha ceelkaagu ay badbaado u leeyihii ilmahaaga waa in la baaro. Wuxuu qaadnaa tillaabooyin dheeri ah si aan u ilaaliyo dhallaanka ku nool guryaheena anagoo adeegsanayna hababka badbaadada sida armaajooinka oo aan daboolno iyo meelaha korontada la gashado oo aan xafidno. Baarista ceelkaaga gaarka ah waa tallaabo kale oo sahan oo lagu xaqiijinayo caafimaadka ilmahaaga!

## Ilmaha waxay halis weyn ugu jiraan waxyelada biyaha wasakhaysan

Ilmuu waxay cabbaan biyo ka badan cabbirkooda marka loo eego carruurta da' ahaan yara weyn iyo dadka waaweyn. Kobaca maskaxda iyo xubnaha kale ee ilmaha si fudud ayaa wax loogu dhimi karaa, jidhkooduna aad uguma fiicna in uu ka takhaluso walxaha waxyelada leh. Wasakhda qaarkood waxay sii martaa hooyada iyada oo u gudbi karta ilmaha xilliga ay hooyadu uurka leedahay.

Waa muhiim inaad baarto biyaha aad u isticmaasho cabbitaanka ama diyaarinta caanaha ilmaha. Tani waxay noqon kartaa biyaha tuubada ee ku yaal saxanka jikada iyo talaajadaada, nidaamka daawaynta oo leh tuubo gooni ah oo u dhow saxankaaga ama agabka biyaha sifeeyaa.

| Baarista              | Inta jeer          | Saameynta caafimaad ay ku leedahay ilmaha  | Waxa ay tahay inaad ka raadiso warbixinta shaybaadhka  |
|-----------------------|--------------------|--|--|
| Bakteeriyada Coliform | Sannad kasta       | Bakteeriyada Coliform waxay muujin kartaa in jeermiska sida bakteeriyada, fayrasyada ama ku dulnoola ay ku jiri karaan biyahaaga. Kuwani waxay keeni karaan shuban, matag, calool maroojis, lallabbo, madax-xanuun, qandho iyo daal. Dhallaanka iyo carruurta waxay u badan tahay inay ku jirran karaan jeermiskan.  | Heer kasta ayaa keeni kara waxyello.   |
| Nitrate               | Sannad kasta       | Maadada kiimikada ah ee Nitrate oo Heerarkeedu sareeyo waxay saameyn kartaa sida dhiiggu u qaado ogsijiinta, waxayna keenta xaalad caadi ahaan loo yaqaan 'blue baby syndrome' taasoo keeni karta jirro halis ah ama dhimasho. Dhallaanka dhalada lagu quudiyo ee da'doodu ka yar tahay lix bilood waxay halis ugu jiraan inay qaadaan cudurka buluugga ah ee ilmaha ku dhaca. | Heerka ka sarreeya 10 mg/L wuxuu keeni karaa waxyello  |
| Lead                  | Ugu yaraan hal mar | Macdanta Lead waxay dhaawici kartaa maskaxda, kelyaha iyo habdhiska neerfayaasha. Lead sidoo kale waxay hoos u dhigi kartaa horumarka dhanka waxbarashada, dhaqanka, waxayna carruurta u keentaa dhibaatooyin dhanka maqalka ah. Dhallaanka iyo carruurta da'doodu ka yar tahay lix sano iyo haweenka uurka leh ayaa khatar caafimaad oo aad u badan ugu jira maadada lead.    | Heer kasta ayaa keeni kara waxyello.   |
| Manganese             | Ugu yaraan hal mar | Heerarka sare ee maadada kiimikada ah ee manganese waxay sababi kartaa dhibaatooyin xaga xusuusta, dareenka iyo xirfadaha dhaqdhaqaqa. Waxaa kale oo ay dhallaanka u keeni kartaa dhibaatooyinka waxbarashada iyo hab-dhaqanka.  | Heerka ka sarreeya 100 µg/L wuxuu keeni karaa waxyello.  |
| Arsenic               | Ugu yaraan hal mar | Heerarka sare ee maadada kiimikada ah ee arsenic waxay ka qeyb qaadataa hoos u dhaca garaadka carruurta waxayna kordhisaa khatarta kansarka kaadiheyta, sambabada iyo beerka. Arsenic sidoo kale waxay kordhisaa khatarta sonkorowga, cudurrada wadnaha iyo dhibaatooyinka ku dhaca maqaarka.  | Heer kasta wuxuu keeni karaa waxyello. Haddii heerku ka sarreeyo 10 µg/L, MDH waxay si adag ugu talinaysaa in la daweyyo biyaha ama la helo ilo kale oo biyo ah. |
| Fluoride              | Ugu yaraan hal mar | Qadarka saxda ah ee fluoride wuxuu ka hortagaa suuska ilkaha gala. Fluoride aad u badan ayaa bedeli kara dhaldhalaalka iliggii leeyayahay.   | Heerka lagu taliyay waa 0.7 mg/L si loo ilaaliyo ilkaha. Dhakhtarka ilmaha ayaa hubin kara inay helayaan qaddarka saxda ah.                                      |
