#### Reading Comprehension T/F

1. True
2. False
3. True
4. True
5. False
6. True

#### Label the Chart

1. esophagus
2. liver
3. stomach
4. colon
5. small intestine
6. rectum
7. anus

**Sequencing:** 5, 6, 3, 2, 1, 4

#### Vocabulary Card Match

1. MOUTH & With your mouth, you chew food into smaller pieces. Chemicals in your saliva help to digest these food pieces.
2. ESOPHAGUS & Food moves down this tube-like body part after you swallow, with the help of muscle contractions. A little flap

covers the windpipe to prevent you from choking!

3. STOMACH & Strong acid (hydrochloric acid) in this organ breaks down proteins in your food.
4. LIVER & This organ makes a fluid called bile which helps release nutrients from your food. It also filters toxins out of the blood.
5. GALL BLADDER & This organ stores bile from the liver and releases it into the small intestine, which helps break down the fat in foods.
6. SMALL INTESTINE & Food moves from the stomach to this organ. Major digestion happens here, and nutrients are absorbed into the circulatory system.
7. LARGE INTESTINE & Undigested food from the small intestine ends up here. Excess water is absorbed by the body, and vitamins K and B are produced.
8. RECTUM & ANUS & Food from the large intestine passes through these body parts. This is where waste is eliminated.

#### Conversation

maintain a healthy diet, exercise, don't smoke, get vaccinated for Hep B

#### Quiz

1. d
2. a
3. b
4. c
5. c
6. d
7. a
8. Talk to doctor, websites: MDH, NIH

#### CCRS STANDARDS ALIGNMENT:

CCR Anchor 1 (Language): Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.

## **Minnesota Department of Health EL Health Curriculum Answer Key – Lesson 8**
