2022 School Health Profiles

The School Health Profiles is a CDC-funded survey of middle and high school principals and lead health education teachers throughout the United States. In Minnesota, The Minnesota Center for Health Statistics administers this survey biennially on a statewide sample of public schools.

Profiles data is used to help state leaders and decision-makers assess gaps in policies and practices that may impact student health and academic performance.

This survey monitors the following areas:

- School health education requirements and content
- Physical education and physical activity
- Practices related to bullying and sexual harassment
- School health policies related to tobacco-use prevention and nutrition
- School-based health services
- Family engagement and community involvement
- School health coordination

In spring 2022, CDC used two questionnaires to collect data-one for school principals and one for lead health education teachers. CDC administered the two questionnaires online to 334 regular public schools containing any of grades 6 through 12 in Minnesota.

CDC received one or both questionnaires from $84 \%$ of eligible sampled schools. CDC received usable questionnaires from principals in $81 \%$ of schools and from lead health education teachers in $77 \%$ of schools.

## Questions and more information

For more information on School Health Profiles in Minnesota, visit: Minnesota Department of Health: School Health Profiles Survey (https://www.health.state.mn.us/data/mchs/surveys/schoolhealthprofiles.html).

For Minnesota-specific data, questions regarding the administration of the survey, or to receive this information in a different format, please contact Health.Profiles@state.mn.us.

## 2022 School Health Profiles Report

Weighted Principal Survey Results

1. Percentage of schools that ever used the School Health Index or other self-assessment tool to assess school policies, activities, and programs in the following areas.
a. Physical education and physical activity

Page 1 of 88
