

Top Four Reasons to Get Your COVID-19 Vaccine

1. It works!

No one wants to be sick, and COVID-19 can make even young, healthy people really sick. The vaccine is safe and works really well at preventing young people 12 and older from getting sick.

2. No more quarantine!

You won't have to miss school, sports, or other activities if you are exposed to someone who has COVID-19 (as long as you don't have symptoms and are fully vaccinated with both doses).

3. Less COVID-19 testing!

Skip the swab up the nose or spitting in a tube! You won't have to get tested as frequently if you're vaccinated.

4. Vaccine side effects aren't that bad!

Feeling a little crummy for a day or two after the shot is normal, and it goes away. It just means your body is gearing up to fight COVID in the future.

Let's get back to the things we love! School, sports, hanging out with friends, and spending time with family. If you are 12 or older, get vaccinated!
