^IHIV Diagnosis includes all new cases of HIV diagnosis (both HIV (non-AIDS) and AIDS at first diagnosis) among Minnesota residents in 2024.

^{II}African-born Black people are reported separately from other Black people (born in the U.S. or elsewhere). The Black, African American population is non-Hispanic. "Other" includes multi-racial persons and persons with unknown race.

^{III}Rates calculated using 2022 CDC Wonder data. The population estimate for African-born persons was calculated by the Minnesota State Demographic Center. The population estimate for Black, non-African-born persons (196,855) was calculated by subtracting the U.S. Census estimate for African-born persons (77,557) from the total Black population (274,412). Note that this assumes that all African-born persons are Black (as opposed to another race).

Numbers exclude federal and private prisoners and refugees in the HIV-Positive Refugee Resettlement Program, as well as refugee/immigrants with an HIV diagnosis prior to arrival in Minnesota.

Percentages may not add to 100 due to rounding.

Data is suppressed below 5.
