December 2023

Trauma Education for Hospital Nurses

Learning Modules now available

A series of 12 electronic learning modules were developed to meet the trauma education requirements for inpatient nurses. The total length of time to complete the modules is approximately four hours. These modules are an optional tool that hospitals can choose to utilize.

The modules are secured on a Cloud Drive at the Minnesota Department of Health. They are available for download to be placed on hospital learning management systems. We are asking you to register the name of the person that will download the modules from the Cloud Drive and upload them onto the hospital learning management system. Please use this [Request for Access link](#).

For additional questions, please email health.trauma@state.mn.us
