### 2018 Child Care Immunization Report

#### Keep a copy for your records. Check your report for errors before submitting. Don’t forget to include your DHS license number.

Complete the following information for all children enrolled in the facility who are 3 months of age to first day of kindergarten.

Fill in the number of children who have received vaccine doses or have provided an exemption for each age group and vaccine (NM=non-medical exemption, ME=medical exemption).

Children who have exemptions on file should be counted in the NM or ME columns regardless of the number of vaccinations they have received.

Children who “Meet Requirements” have received all of the required vaccinations based on their current age.

Children who are “In Progress” have received at minimum 1 dose of vaccine and are in the process of completing the required vaccine series.

The total column for each vaccine should equal the total number of children enrolled for that age group (see example at the top of the chart).

---

#### Table: Immunization Report

<table>
<thead>
<tr>
<th>Age Group</th>

</table>

### Notes

1. Children who are exempt must have a statement on file in accordance with MS121A.15.

2. If a child has already had chickenpox disease, varicella shots are not required. If disease occurred after Sept. 1, 2010, the child’s doctor must sign a form. Children with a history of chickenpox should be counted in the “History of Disease” column.
