- Vaccine staff

### FluMist replacement program

McKesson is offering a FluMist replacement program for product purchased through the Centers for Disease Control and Prevention (CDC) contract for the 2024-2025 season. This applies to MnVFC and UUAV FluMist doses. The program allows for the replacement of unused, expiring FluMist doses at no cost to help you maximize product usage opportunities. If you would like to take advantage of this program contact the AstraZeneca Replacement Program by phone at 1-877-633-7375 or email at [flumistreplacement@mckesson.com](mailto:flumistreplacement@mckesson.com).

Eligibility guidelines:

- Doses must have been purchased on the CDC contract. Private doses are not eligible.
- Product expiration date must be on or before February 2, 2025.
- AstraZeneca will replace expired doses of FluMist while supplies last.

Requests can be made now through Friday, January 31, 2025, at 7 p.m. CST.

### MnVFC respiratory vaccines still available

It's not too late to immunize kids against respiratory diseases. We want to encourage MnVFC providers to continue to order and offer flu, RSV, and COVID-19 immunizations this season. Here are details on each product type and how to order:

- **MnVFC flu vaccine:** We still have MnVFC flu vaccine available to order for this season. MnVFC flu providers can request additional flu doses for MnVFC at any time in the "2024-2025 MnVFC pediatric influenza vaccine prebook" event in MIIC.
- **MnVFC COVID-19 vaccine:** We still have MnVFC COVID-19 vaccine available for this season. We encourage you to order more to help protect kids this season. Sites can place orders using the routine vaccine ordering form in MIIC.
- **MnVFC nirsevimab:** We will continue allocating nirsevimab to clinics on a rolling basis, based on the requests received in the current "2024-2025 Nirsevimab Phase 2" event in MIIC. We are planning to open another ordering event in MIIC soon to capture requests for doses needed Jan through March; stay tuned for more information.
